## About **PIXM**

PIXM VFX is a production-focused visual effects studio delivering world-class VFX, disciplined line production, and infrastructure-driven solutions for modern cinema, OTT, and large-scale content creation. By combining creative excellence with operational precision, PIXM empowers productions with clarity, consistency, and scalable execution from concept to final frame.

### **Mission:**

Deliver uncompromising quality and efficiency in every frame.

### **Vision:**

Redefine visual storytelling through smarter workflows, creative precision, and cutting-edge technology

### **USP:**

**Filmmaker-Founded Discipline** PIXM replaces production chaos with structured workflows, technical precision, and transparent execution. We build production clarity before visual effects, ensuring every project moves with confidence, control, and creative excellence.

## What We Do

### **VFX & Compositing:**

Seamless integration of live-action and CGI for cinematic storytelling.

### **Virtual Production:**

Real-time rendering and immersive previsualization for efficient shoot-to-screen workflows.

### **Pipeline Engineering & Automation:**

Optimized workflows and QC-first delivery to ensure speed and consistency.

### **Motion Design:**

Striking visuals for films, commercials, and product launches.

### **CGI & 3D Animation:**

Realistic assets, environments, and character animation with lifelike precision.

### **Line Production & On-Set Supervision:**

End-to-end creative and technical support from concept to final shot.
